

# REACT CONFERENCE COMMUNICATIONS GO KIT

REACT Conference Communications (CONCOM) Go Kit is meant to Augment local capabilities or provide remote off site conference call capabilities.

1. Meeting Owl Pro
  - a. 360 Degree Camera for entire room meetings
  - b. camera, mic, speaker into one easy to use device.
  - c. used with Google Meets, Zoom or any other meeting application that an external webcam can be connected to
  
2. VTec VCS754 ErisStation SIP Conference Phone
  - a. 2 Session Initiation Protocol (SIP) Lines
    - i. 720-798-5789
    - ii. Ham Shack Hotline 50139
  - b. four expandable microphones for whole room conferencing
  - c. Allows any internet connection to become a conference phone line
  
3. Poly Com Voice Station 300 Conference Phone
  - a. Uses standard copper wire phone lines
  - b. great use for small room meetings and conference tables.

With these three platforms users have the option of conducting online meetings using software, using the internet connection to connect to regular phone lines and numbers or using a standard copper wire phone line to conduct conference calls. In today's world with remote work and our REACT Team covering a large geographically diverse region we can still conduct business remotely.
