

REACT STARLINK GO KIT

Starlink provides high-speed, low-latency broadband across the globe.

Using advanced satellites in a low orbit, Starlink enables video calls, online gaming, streaming, and other high data rate activities that historically have not been possible with satellite internet

1. Stats / Speeds
 - a. 100Mb/s and 200Mb/s average
 - i. upto 560Mb/s
 - ii. 20-30ms latency
 - b. Built in Wireless Router
 - i. 2.4GHz network
 - ii. 5.8GHz network
 - iii. Optional Wired Ethernet Port
 - c. Mounting Options
 - i. Wall Mounts
 - ii. Pole Mount
 - iii. Pivot Mount
 - iv. Ground Mount
 - d. Cable Lengths
 - i. 75'
 - ii. 150'
 - e. Usage
 - i. Unreliable Cellular or higher speeds needed.
 - ii. Remote locations where the internet is unavailable.
 - iii. Augment emergency services data systems when outages occur during disasters.
